

Ilya Razenshteyn

ilyaraz@mit.edu

July 2, 2018

Research interests

Similarity search, sketching, metric embeddings, high-dimensional geometry, streaming algorithms, compressed sensing, combinatorial optimization.

Education

2012–2017 **Massachusetts Institute of Technology**

Ph. D. in Computer Science

Advisor: *Piotr Indyk*

S. M. thesis: *Beyond Locality-Sensitive Hashing*

Ph. D. thesis: *High-Dimensional Similarity Search and Sketching: Algorithms and Hardness*

2007–2012 **Lomonosov Moscow State University**

M. Sc. in Mathematics

Advisors: *Maxim Babenko* and *Alexander Shen*

Thesis: *Covering Shortest Paths in Undirected Graphs*

Awards and honors

- EATCS Distinguished Dissertation Award, 2018
- Paper [6] invited to the Highlights of Algorithms conference, Paris, 2018
- George M. Sprowls Awards for Best PhD Thesis in Computer Science, 2017
- Simons Foundation Junior Fellowship, 2017
- Paper [9] invited to the Highlights of Algorithms conference, Berlin, 2017
- Paper [7] invited to the special issue of ACM Transactions on Algorithms, 2017
- Papers [14] and [15] invited to the Highlights of Algorithms conference, Paris, 2016
- Paper [14] invited to the special issue of SIAM Journal on Computing, 2015
- Akamai Presidential Fellowship, 2012
- Kolmogorov Fellowship, 2009–2012
- Gold medal at ACM International Collegiate Programming Contest, 2010
- Gold medals at International Olympiads in Informatics, 2006, 2007

Program committees

- 51st ACM Symposium on Theory of Computing (STOC 2019)
- 28th ACM-SIAM Symposium on Discrete Algorithms (SODA 2019)
- 13th International Computer Science Symposium in Russia (CSR 2018)
- 15th International Symposium on Experimental Algorithms (SEA 2016)

Publications

1. A. Andoni, A. Naor, A. Nikolov, I. Razenshteyn and E. Waingarten, **Hölder Homeomorphisms and Approximate Nearest Neighbors**, proceedings of *59th Annual IEEE Symposium on Foundations of Computer Science (FOCS)*, 2018.
2. A. Andoni, A. Naor, A. Nikolov, I. Razenshteyn and E. Waingarten, **Data-Dependent Hashing via Nonlinear Spectral Gaps**, proceedings of *50th ACM Symposium on Theory of Computing (STOC)*, 2018.

Research internships

- 2016 **Microsoft Research Redmond**
Mentor: *Konstantin Makarychev*
Nonlinear dimension reduction via outer bi-Lipschitz extensions [3]
- 2015 **IBM Research Almaden**
Mentor: *David Woodruff*
Weighted low rank approximations with provable guarantees [10]
- 2014 **Microsoft Research Silicon Valley**
Mentor: *Alexandr Andoni*
Equivalence between sketches and embeddings for general norms [14]
Optimal data-dependent hashing for the high-dimensional nearest neighbor search [15]
- 2013 **Google New York**
Mentors: *Silvio Lattanzi* and *Vahab Mirrokni*
Universal outliers for k -center clustering [17]
- 2011 **Microsoft Research Silicon Valley**
Mentors: *Andrew Goldberg* and *Renato Werneck*
Fast exact algorithm for the minimum bisection problem [16]
- 2010 **Microsoft Research Silicon Valley**
Mentors: *Andrew Goldberg* and *Renato Werneck*
Efficient heuristic for partitioning road networks [21]
